2016																			
186	06/12/2016	06/12/2016	Mammal marsupial	Parma wallaby	<i>Macropus parma</i>	MP0130	F		3.05	956000003040669	Vet hospital	Been aggressively mated over the weekend, taken to vet room Monday unable to stand given supportive care and analgesia until vet visit	Euthanased fracture to distal femur lots of soft tissue damage and haemorrhage around fracture site. Abdominal abscess.	Trauma	Conspecific injury	NA	NA	TC	
195	16/12/2016	16/12/2016	Mammal marsupial	Parma wallaby	<i>Macropus parma</i>		F		3.8kg	956000003040266	Tropical house	Found dead at morning checks	Fractured maxilla, missing 4 incisors and hole in soft palate that communicates with nasal cavity. puss on surface of liver, small amount blood stained fluid in abdominal cavity		RTA / Trauma	NA	NA	TC	
198	24/12/2016	27/12/2016	Mammal marsupial	Parma wallaby	<i>Macropus parma</i>	MP0134	M	Adult		956000003037936	Tambopata aviary	Found dead in spoonbill end of Aviary	The animal was in reasonable body condition but had an empty stomach and very little gut content indicating a lack of food intake for at least 2 days. There were no signs of injury. There was a little free fluid in the abdomen and congested liver and kidneys. There was a small 1.5cm abscess on the edge of a liver lobe. There was some free fluid in both thoracic cavities both left and right submandibular lymph nodes were very swollen and firm. They both contained lobulated areas of green pus.	Septicaemia with the source of the infection being the submandibular lymph nodes	Open	NA	NA	RB	
199	25/12/2016	27/12/2016	Mammal marsupial	Parma wallaby	<i>Macropus parma</i>	MP0141	M	Adult		956000004774977	Tambopata aviary	Paralysed R.H leg, unable to stand given 120 ml s/c fluids and 1ml Dexadrosson	there were no signs of injury.		Open	NA	NA	RB	
2017																			
6	01/06/2017	01/06/2017	Mammal Marsupial	Parma wallaby	<i>Macropus parma</i>	MP0129(DG)	F	3y 4m	2.7kg	956000002950884	Tropical house	Found at morning checks no previous history	R maxilla fractured, missing incisor teeth on left side, some bruising on upper left lip, and a hole in the hard palate. Small amount of hard puss in abdomen. Stomach empty, s.i brown liqued. Faecal matter L.I. Some fur missing on ventral tail, slight swelling at dorsal tail base. Hind feet keratinised, smal unfured Joey in pouch Euthanased.	Trauma	Trauma	NA	NA	TC	
7	01/07/2017	01/09/2017	Mammal Marsupial	Parma wallaby	<i>Macropus parma</i>	MP0142(DG)	M	11m	2.55kg	956000004829650	Tropical house	Been treated for an infected toe, had lost weight			Infectious	NA	NA	JC	
23	15/01/2017	15/01/2017	Mammal Marsupial	Parma wallaby	<i>Macropus parma</i>	MP0177(DG)	F	3y5m	3.6kg	NA	Tropical house	Found this morning, unusually QAR, given s/c fluid, superficial wound on dorsal tail cleaned and flazamine cream applied. Keepers to monitor	Diphtheric hepatitis with associated local peritonitis 2. Serosanguinous peritoneal effusion 3. Mesenteric lymphadenopathy 4. Intercostal and abdominal musculature petechiae 5. Dorsal superficial wounds to the tail consistent with suspected rodent injuries	suspicious of yersiniosis. Tissues have been retained for culture for confirmation and	Infectious	NA	NA	JC
